Question 2 - What features of the campus need to be enhanced and/or changed? What is missing?

The grass on the Quad. There are a few big pockets of dirt where nice grass should be.

Maybe more research laboratories.

More parking spaces.

Easier access to Constitution Trail.

Outdoor study places.

Flowers and greenery.

Update Metcalf School/Fairchild Hall.

Better football field.

More green.

Safer crosswalks and walkways.

Atmosphere of academic buildings is too formal.

More ISU paraphernalia.

School spirit and art.

More student friendly spaces in the Bone Student Center.

I think that the Bone Student Center should be more of a focal point of campus and something should be done to draw more students to it.

Milner Library.

Bone Student Center.

Center for the Visual Arts.

Center for the Visual Arts.

Bone Student Center.

Better lecture halls.

Less waste.

Improve football stadium seating, concessions, restrooms, and view from Main Street.

Better lecture halls.

Watterson elevators.

A more cohesive brick used throughout the building as well as a cohesive “collegiate” feeling throughout, almost “old fashioned”.

University Street should be open to get to the College of Business building.

We need a Law School.

We need wireless throughout the campus.

Need to upgrade/replace football stadium.

Some of the buildings could be expanded on to create more classroom and laboratory space.

Milner Library could use some work (new furniture, computers, etc.).

Update Bone Student Center.

Update Student Services Building.

Wireless.

Stairs by bridge between Schroeder Hall and Milner plaza.

Milner Library! No more leaks, more seats, more electrical outlets.

The Center for Visual Arts and the classroom in there could use a renovation.

Milner Library often fills up leaving little room for more students to come and study or work.

There are very few restaurants walking distance to campus.

I feel as though many of the buildings in Uptown Normal as well as on Main Street.. are run down and not great to look at.

Renovate Hancock Stadium to increase seating capacity so we can move to Division I!

The Bone Student Center should be reevaluated. It is not capable of being a “center” for student life. It is out of date in comparison with similarly sized universities. Make up in the form of renovations is only a temporary fix to a longstanding problem.

I would like to see a new residence hall in place of Southside.

Another change that could be made is a renovation of the Bowling and Billiards Center.

Some of the older academic buildings could use a facelift.

I would like to see more parking areas closer to campus.

Watterson Towers needs to be completely renovated.

Better fitness equipment in the dorms.

Quality of food in the dorms.

The Bone Student Center being more of a student building.

I like how the buildings look old and have a great feel to them, but the insides/classrooms need to be kept up and remodeled towards new technology advances—like College of Business building was!

The only things I can think of are being currently addressed, a closer recreation building and trayless dining. As long as things stay updated I think ISU is in great shape.

I think that a Reggie statue similar to what is at athletic events would be a great addition to the Quad. A definite boost to school spirit!

The campus needs a better place to play football.

Expand Hancock Stadium.

Moving towards sustainability. Initiatives are always something I support and hope happens.

Hope to see the Agriculture department and Horticulture department expand and thrive.

Improve the football stadium.

Watterson is getting old.

Milner Library needs more seating and computers.

The Quad could have a giant map of the Bloomington/Normal Public Transit System fixed bus routes. This would make it more off-campus friendly, especially when the campus expands.

More school pride in buildings through photos, artwork, Reggie, ISU's logo, anything.

More Registered Student Organization spaces. RSOs are expanding in numbers, size, and goals. The Bone Student Center is always rented out and RSOs are left with few options for meetings, performances, banquets, etc.

Wi-Fi coverage in all buildings on campus, in all rooms, and possibly in the Quad.

Community garden.

Heated underground tunnel to Milner Library.

Updated Milner Library

Cohesiveness of campus architecture.

Hancock stadium!

More appealing Bone Student Center with more rooms.
