***Question 5 - What changes would you like to see in the next five years? The next 10 years?***

Coffee shop (in addition to Einstein) (five years).

Fix Milner Library issues (leaking etc.).

Entire campus wireless (Quad too).

Expand Bone Student Center (10 years).

Move all of the Dean of Students into the Bone Student Center.

Make Milner plaza part of a building (connect Milner Library and Bone Student Center).

More parking for off campus student driving to campus for class.

LEED buildings – support LEED AP program.

Wind/solar/geothermal- reduce energy costs and support/learning aids for ISU degrees.

I am very excited for the new recreation center to open up.

I would like to see other colleges receive the funding and building renovations that the College of Business received to allow other colleges to benefit as much as the business department.

New professional school of some kind (law, medical, etc.).

More cohesive architecture.

Pond in the Quad.

More cohesive architecture.

Top student center.

Greek row.

New dorms.

Pond in the Quad.

I would love to see more students attend ISU (greater population) with an expanded opportunity for more colleges and their corresponding buildings.

Bigger dorms to replace Southside.

Better lecture halls.

Bone Student Center revitalization complete.

Campus incorporation into Uptown Normal.

I think it would be good to have a new residence hall building the size of Watterson built where Southside currently is and make sure it has a good dining center.

Let us use our flex dollars in more of the stores and restaurants close to campus.

A new residence hall built over where Southside is right now.

Changes to Milner Library, especially the ground floor as it has a lot of water leaking issues.

A renovation of Horton Fieldhouse.

Aesthetic changes to the older academic buildings.

Renovations to Linkins dining center.

A fountain center piece on the Quad.

A new center for the visual arts. I love it now but cannot wait for the future of the building.

Trayless dining.

Convenience store option for quick needs.

Enhancements to the Bone Student Center – make it more of a state of the art place to gather – make it THE PLACE to be!

More landscaping, etc.

A concrete plan to develop a new student center. Temporary renovations are only a band-aid. A new student center that has student priorities in mind will continue to encourage school pride.

I would like to see more student art on campus (five years).

I would like to see more academic buildings (10 years).

More school pride. Cheap prices through Red Alert encourage students to attend games, but not enough.

More parking, always a complaint but always a problem. Great prices for commuter passes though.

Hold students to a higher standard.

More environmental technologies in use.

More efficient use of space.

New improved academic buildings.

Expand Milner Library space.

More library space or an addition to the library.

Less construction occurring simultaneously (five years).

More accessible parking (10 years).

More connections with Uptown Normal (10 years).

Completed renovation of the Bone Student Center (five years).

More accessible parking.

Expand graduate programs-use new buildings for research and classrooms.

A completely renovated campus free of construction close-offs (five years).

A more environmentally, culture friendly, community (10 years).

Renovate or replace DeGarmo Hall, Fairchild Hall, Metcalf School (five years).

Modernize other classroom areas on campus (five years).

New student residence hall to replace South Campus (10 years).

Nicer residence hall plan to take place of Atkin-Colby, etc. (five years).

New football facility plan in place (10 years).

Update Metcalf School. (five years).

Update Fairchild Hall (five years).

Enhance sport facilities (five years).

Renovate residence halls (five years).

New technology in all buildings.

Updated Milner Library.

Watterson renovations (five years).

Bone Student Center and Milner Library renovations cohesiveness of University architecture/art (more classic, Jeffersonian or 2000+ style) (10 years).

I would like to see less general education requirements for graduation. ISU is above the national requirement in this area. The argument to this is that it makes students more well-rounded. I can say as a student, and I think most students would agree, that I do not remember a single thing from any of the general education courses that I took. The material is only put into the short-term memory because they are classes that we just need to get through. Instead of requiring extra classes that we will forget right after we take them, ISU should require more major-related classes that will actually benefit us later on.

I wish there were more performance venues on campus. Braden Auditorium and the Brown Ballroom are always booked. Capen is usually reserved or restricted. There are so many Registered Student Organizations and not enough places to express themselves. Center for the Performing Arts is off limits. Alumni Center is really far.

I wish the campus was a little more off-campus friendlier. There is a map of campus on the central Quad. Why not get a map of the Bloomington/Normal Public Transit System fixed routes.
